Performance Testing

Yugabyte

Dynatrace

Certifications

React, NodeJS, Express & MongoDB - The MERN Fullstack Guide

Google Kick Start 2022 (Round A)

AWS Certifications

Practitioner: Introduction to YugabyteDB

Practitioner: YugabyteDB Managed Basics

Mahesh Thorat

Software Developer @FYNDNA

Pune District, Maharashtra, India

Summary

Passionate about building scalable backend systems and microservices. I specialize in Java, Spring Boot, and Kubernetes, with hands-on experience in Kafka, Docker, SQL, and performance monitoring using Dynatrace.

Key Skills: Java, Spring Boot, Kafka, Kubernetes, Docker, SQL, Helm, Dynatrace

Tools & Tech: Git, PostgreSQL, YugaByteDB, Jira, Dapr, Temporal

Education:

- B.Tech in Information Technology – GCE Karad (CGPA: 9.10)
- MHT-CET: 98.33% | SSC: 88.80%

Highlights:

- 4#on CodeChef | Specialist on Codeforces
- Global Rank 368 in CodeChef Cook-Off.
- 1000+ coding problems solved (LeetCode, CF, CC)
- Finalist – Code Gladiators 2022 (Top 700/3.5L+)
- Winner – College-level coding contest (150+ participants)

Projects:

- Handyman Services Booking Web App – Angular + Node.js + ML
- Reusable Academic Material Marketplace – React + Node.js
- Java-based Electricity Billing System

Leadership & Engagement:

- Former Technical Head @ Alphageeks (GCEK coding club)
- Led hackathon site dev and web dev sessions
- Problem Setter – Let'sCode Contest, GCEK

Certifications:

- MERN Stack (Udemy) | AWS Fundamentals | Python (HackerRank)

Always excited to solve real-world problems, explore new tech, and grow with like-minded professionals. Let's connect!

Experience

FYNDNA TechCorp Pvt. Ltd

Software Developer

July 2023 - Present (2 years 11 months)

Pune District

Alphageeks(GCEK Coding Club)

Technical Head

November 2021 - April 2023 (1 year 6 months)

Karad, Maharashtra, India

- Delivered sessions on Frontend Web Development, API integration and Programming languages.
- I led a session on React where I demonstrated how to create a COVID-19 tracker application. This involved showcasing real-time data of COVID- 19 cases and hosting the application on Netlify, providing students with practical experience in utilizing React.
- Arranged coding contests for students.
- Problems setter at 'LetsCode', a practice coding contest at GCEK.
