

Associate Software Developer

1.6 Years Experience

ABOUT ME

Software Developer with 1.6 years of experience building scalable, user-focused applications using Nest.js, Next.js, Feathers.js, and React. Committed to writing clean, efficient code, embracing new technologies, and contributing to innovative solutions that support team

CURRENT COMPANY

Apr 2024 - Present

Valueadd Softtech

Responsibilities

- Continuously learn and adopt new technologies to enhance both personal and organizational growth.
- Collaborate with team members to design, build, and deploy scalable and efficient solutions.
- Develop and maintain web applications using Nest.js, Next.js, Feathers.js, and React.
- Write clean, maintainable code and perform debugging to ensure high-quality performance.

SKILLS

- | | | | |
|-----------|--------------|---------------|-----------|
| • Reactjs | • Javascript | • Typescript | • Nodejs |
| • Nextjs | • Nestjs | • TailwindCSS | • MongoDB |
| • MySQL | • HTML | • CSS | |

TOOLS

- | | | | |
|-----------|----------|-------------|----------|
| • Postman | • Github | • Cursor AI | • Chagpt |
| • Figma | • Jira | • VS Code | |

PROJECTS WORKED ON

1. Aspenify

Duration of Project: 8 Months

Technology Used: JavaScript, React, Next.js, MongoDB

Tools used: BitBucket, VsCode, Docker, Jenkins

Team Size: 5-6

Project Description:

Aspenify is a web portal that design, develop and manage a digital application. It simplifies project requirement using generate playbook. It creates subject flow with their specific roles and responsibilities.

Role in the Project:

As part of the Aspenify project, I focused on UI design and front-end improvements to deliver a seamless and engaging user experience. My responsibilities included implementing new interface elements, refining existing layouts, and ensuring responsive, high-quality visuals. I also played a key role in identifying and fixing front-end bugs, optimizing performance, and maintaining design consistency across different modules.

Collaboration with designers, backend teams, and QA engineers was an essential part of my role, ensuring that all updates were well-integrated and aligned with project goals.

2. IWT

Duration of Project: Oct 2025 - Present

Technology Used: Reactjs, Nestjs

Tools used: VSCode

Team Size: 5-6

Project Description:

IWT is a mining-focused application designed to monitor and manage mine operations in real-time. It provides live dashboards and reports across modules like Location and Atmosphere. The Location module tracks miner positions, check-ins, section timings, and underground/above-ground movement. The Atmosphere module monitors gas levels (CO, H2, N2), absolute pressure, and triggers alarms for unsafe conditions, while also providing hourly and daily min/max/average statistics.

Role in the Project:

In the IWT project, I worked on the integration of the Atmosphere module, which involved implementing and managing dynamic tables and interactive graphs to visualize key data insights. I contributed to the UI design and development, ensuring a consistent and user-friendly interface. Additionally, I resolved UI and functional bugs, optimized performance, and collaborated with cross-functional teams to ensure smooth integration and data flow across modules.

In the Predictive Compliance module, I was involved in both integration and functionality enhancements, focusing on improving user experience and ensuring reliable data communication between components. My responsibilities included developing responsive UI elements, fixing critical issues, and enhancing module performance to support accurate and efficient compliance tracking.

OTHER PROJECTS

The Hotel Management System is a full-stack web application designed to streamline hotel operations and enhance the guest experience. The system allows users to book rooms, order food, and schedule spa appointments through an intuitive, interactive interface. The system includes features like real-time room status updates, order tracking, role-based access control (for admin, staff, and customers),
