

# Associate Software Engineer

3 Years Experience

## ABOUT ME

---

Passionate about building scalable web applications with .NET Core and Angular. Skilled in front-end and back-end development, delivering efficient, user-focused solutions. Thrives in fast-paced, Agile environments.

## CURRENT COMPANY

---

### 2024 - Present

#### Valueadd Softtech

#### Responsibilities

- Develop and enhance web applications using .NET Core, Angular, and Web API for scalable, high-performance solutions.
- Work with Entity Framework, LINQ, and SQL Server for efficient data handling and integration.
- Collaborate in Agile teams for sprint planning, code reviews, and delivering quality, on-time releases.
- Designed and implemented RESTful APIs and integrated front-end interfaces using Angular Material and Bootstrap.

## SKILLS

---

- |                    |                 |                   |              |
|--------------------|-----------------|-------------------|--------------|
| • .NET Core        | • Angular       | • RESTful API     | • LINQ       |
| • Entity Framework | • SQL Server    | • Problem Solving | • TypeScript |
| • C#               | • MongoDB       | • Javascript      | • HTML/CSS   |
| • JSON             | • OOPS Concepts |                   |              |

## TOOLS

---

- |           |                 |                      |             |
|-----------|-----------------|----------------------|-------------|
| • Git     | • Visual Studio | • Visual Studio Code | • SSMS      |
| • Postman | • Chat GPT      | • GitHub Co-pilot    | • Cursor AI |
| • Jira    | • Claude        | • Tableau            |             |

# PROJECTS WORKED ON

---

## 1. Predictive Compliance

**Duration of Project:** 1 Year

**Technology Used:** .NET Core, SQL Server, ReactJs

**Tools used:** Visual Studio, SSMS, Jira

**Team Size:** 5-6

### Project Description :

Predictive Compliance leverages MSHA data and predictive algorithms to monitor violations and forecast potential penalties. It helps mining companies ensure compliance, enhance safety, and reduce costs.

### Role in the Project :

- Designed and implemented RESTful APIs to integrate front-end and back-end functionalities. Worked with SQL Server and Entity Framework for efficient data management and retrieval. Created interactive dashboards and visualizations using Tableau. Collaborated in Agile sprints for requirement analysis and delivery. Conducted code reviews and unit testing to ensure high-quality and maintainable code. Optimized application performance and improved query efficiency for faster data retrieval. Documented technical specifications and contributed to process improvement initiatives. Documented technical specifications and contributed to process improvement initiatives.

## 2. University Management System

**Duration of Project:** 3 Months

**Technology Used:** Angular, Node, SQL Server

**Tools used:** Visual Studio Code, SSMS, Jira, Git

**Team Size:** 8-9

### Project Description :

A University Management System that streamlines academic and administrative workflows, managing student, faculty, and course information while automating enrollment, scheduling, and reporting.

### Role in the Project :

Managed student and admin portals, implementing features such as course admissions and related academic workflows. Designed and modified database schemas and created or updated stored procedures as needed. Developed and maintained RESTful APIs to connect front-end and back-end functionalities. Contributed to project documentation, ensuring clarity for future maintenance and enhancements. Worked closely with the team to deliver project features efficiently while ensuring high-quality standards. Performed testing, debugging, and code optimization to ensure smooth and reliable application performance.

## 3. Fifth Port

**Duration of Project:** 1 Year

**Technology Used:** .NET Core, Angular, MongoDB

**Tools used:** VS Code, Visual Studio, Mongo Compass

**Team Size:** 10-11

### Project Description :

The 5thPort Patient Education Platform educates patients during clinical visits and supports clinical trial recruitment. It streamlines communication with healthcare providers while ensuring compliance with clinical protocols.

### Role in the Project :

Worked on feature development for patient education and clinical trial workflows, including interactive content and digital consent processes. Handled both front-end (Angular) and back-end (.NET Core) development to deliver secure and responsive functionality. Participated in sprint planning, daily stand-ups, retrospectives, and sprint showcases, using JIRA for task management. Collaborated with QA and BA teams to validate requirements, perform testing, and ensure quality deliverables.

## OTHER PROJECTS

---

Worked on 3 additional projects across workforce management, logistics, and education domains. Handled requirements analysis, development, and integration activities, ensuring timely delivery and quality outcomes. Collaborated with cross-functional teams to enhance system performance and user experience.
